Foreign News and Views

English is the most popular foreign language in the new Russia.

Wool manufacture is one of the oldest and most important industries in Portugal.

The estimated cost of rebuilding the battle wrecked section of Shanghai, China, is placed at \$23,000,000.

The palaces in Vatican City, Rome, Italy, are to be heated by electricity from a new oil burning electric plant.

Snuldee in England, without evidence of insanity, is considered a felony and all property left is taken by the state.

Traces of helium gas have recently been discovered in Toulon, France, by engineers searching for a subterranean water supply.

Authorities in Soviet Russia are now permitting "more fun" in life by lifting restrictions against kissing, neckties, gny music, dancing, and phonographs.

Crown Prince Gustaf Adolf of Sweden, aged 49, oldest of European heirs presumptive, spends most of his time between his archeological studies and his family duties.

Spain's 50 peseta notes bearing the portrait of ex King Alfonso are being supplanted with ones carrying the portrait of the seventeenth century painter, Velasquez.

Imperfect articles from government workshops in Russia are placed on display in "windows of disgrace" as a warning to workers that their work is not up to standard.

A fortress in which England's gold reserves will be housed, containing safes, impregnable to assault, bombardment, dynamite and flood for 500 years, is being built under the streets of London.

The government of Austria now controls the selection of Christian names of baby Austrians. It has at ways been forbidden for children to be called by names which offend against public morality or good order.

Italy is said to have the most efficient fast moving corps in the world with a "flying infantry" consisting of a division of bicycle Bersaglieri troops, light armored cars, motor drawn artillery and airplanes.

Poppies, unknown in Europe before the World War, cost the farmers of France this year 1,000,000 bushels of wheat. The plants have spread with such rapidity that they have become the greatest nuisance French farmers have to contend with.

Despite the economic hardships of recent years, the number of newspapers printed in Germany has risen from 3360 to 4703. The paper with the smallest circulation has only 55 purchasers, whereas the one with the largest has about 600,000.

A proposal has been introduced in the chamber of deputies to abolish the use of the guillotine as the official machine of execution in France. Instead, the project would sentence criminals, ordinarily sent to the guillotine, to life imprisonment at hard labor.

Chile has the most extensive national air developments in South America, an army air corps with some hundred first class planes and hundreds of well trained pilots. This air corps operates a line from the Peruvian border to the southern edge of civilization in this baby ribbon republic.

F. C. Williams, butcher of Lethbridge, committed suicide last Thursday, and was found in a dying condition in a machine shed by his son and a neighbor. It was decided that no inquest would be necessary, it being a clear case of death by self-inflicted wounds from a single barrel shotgun.

News Notes

Constable Ellis of Mngnath was here on Thursday last.

Dale Gibb of Magreth was a Raymond visitor on Saturday of last week.

Delila Benett has been working in the Safeway Store this week helping in the preparations for opening.

Harries Walker and Bruce and Midred Galbraith were in Lethbridge Saturday night attending the Elks Carnival.

Ralph Bros. were busy Saturday and Monday hauling the goods out for the opening of the new Safeway Store which will take place here tomorrow.

It is reported that Peter Veregin, Doukhobor leader, now serving an eighteen months term in Prince Albert for perjury has been served with papers for deportation when his term is completed.

The Foremost-Burdett area will have three times the wheat sales this year that they had last, and while they will not have much to apply on old accounts, it is expected that current accounts will be pretty well cleaned up.

Quite a number of Distress Warrants for taxes have been served recently, and of course they have been received in a variety of ways by the victims. Generally, though people feel pretty good about it as they are anxious to get their taxes paid and get our schools in operation before the season is too far advanced.

William Carstensen, farmer of the Toland district was almost instantly killed Monday of last week when he was drawn into the threshing machine with the drive belt, his arm nearly torn from its socket and his skull fractured. Workers on the machine said it all happened so quickly that they are not sure just what did take place. He died about ten minutes after the accident.

37 men were killed, many injured and several missing when a Ferry Boat carrying 200 iron workers to their days work on a new penitentiary in the East River was blown to bits when the boilers exploded and bodies were hurled fifty feet into the air. The ferry had just backed out when the people on the dock were stunned by the explosion and looked about to see bits of the vessel scattered through the air and bodies of workmen still coming down. It was the worst river tragedy since 1926.

General Conditions

Prairie Provinces—While a somewhat more optimistic feeling prevails, business returns do not indicate any decided improvement. Greenery and wearing apparel are moving in about the same volume as that of last year. Stocks in general on retail stores are low. Little new construction work is being undertaken and the automobile trade continues quiet. Wheat prices have ruled higher than in the previous month, but exports have continued in comparatively small volume, importers being reluctant to buy in view of the approaching maturity of crops in Europe. The carry-over of Canadian wheat in all positions at the end of the crop year July 31st was 136,837,000 bus. compared with 140,877,999 bus. last year. Cash wheat closed on the 22nd instant at 54 1/2 cts. Live stock receipts during the month have consisted chiefly of medium and plain grades which have realized lower prices. Prices for high grade cattle continue steadily. Hauling is general and threshing has commenced. Indications point to an average wheat crop or better over most of Alberta, Manitoba and northern Saskatchewan, but large areas in southern and central Saskatchewan have been seriously damaged by drought and heat and yields will be greatly reduced.—Bank of Montreal Letter

Re School Opening

While every effort is being made to arrange for the opening of Raymond's Schools at the earliest possible date, we were unable when we were ready to go to press to get anything definite about any date other than what has been given. The Board met last week and discussed the situation and the Town has been busy with warrants for a return on grain, etc., to wake people up to the necessity of people paying these taxes. While everyone regrets the fact that school is not being held, in a way, we are all guilty of the crime of delinquency in tax paying, and we should therefore be a little patient, and extend our co-operation to the Board now, and to the Staff when school does commence, and encourage the pupils to put forth their best efforts so that the scholastic standing, and the average of passes in the schools will not be too serious when the next examination takes place.

Safeway Store Opening Tomorrow

A much talked of event will take place tomorrow when the Safeway Store here in Raymond will be opened to the public tomorrow morning, Friday, Sept. 16th, with a brand new stock of goods from start to finish. A crew of six or eight men have been busy all this week, following the remodeling of the store in unpacking and marking and arranging the goods in Safeway fashion, and when the doors swing open to the public, it will be ready with a complete stock of groceries, fruits, vegetables, etc.

News Notes

Mr. Phoebe of Calgary will be the Manager of the local Safeway Store.

Mr. and Mrs. S. I. May spent Sunday in Cardston and district with relatives and friends.

Ross May of Magreth has been at the Safeway this week assisting in preparing the Store for the opening.

J. M. Atterton of Cardston was a Raymond visitor on Thursday last, returning to Cardston that afternoon.

Mr. Kraft, Southern Alberta manager of Safeway Stores, has been here all week supervising the arrangements and work in the store, and bills announcing the opening have been mailed to southern Alberta towns, and together with the special ad, in this paper, the public of the town and district have been well advised of the dates, and it is expected that the new store will be the centre of considerable interest over the week-end at least to purchasers and visitors.

News Notes

Due to the trouble between Bolivia and Paraguay, the latter was busy last week mobilizing all men between the ages of 33 and 40, and preparing for a defensive campaign in the Chaco territory which is the bone of contention now.

The Crane Lumber Co. at Thessalon, Ont., suffered a loss of between \$250,000 and \$300,000 last week when a fire burned nine million feet of sawn lumber and was still burning in their yards Saturday.

Health Service

OF THE
Canadian Medical Association

Edited by
GRANT FLEMING, M.D., ASSOCIATE SECRETARY

MENTAL HEALTH

As individuals we differ mentally just as we do physically. Parents accept, as a matter of course, the fact that one of their children is physically stronger than another; yet these same parents will, in general, refuse to recognize the fact that one of their children is mentally below the standard of the others.

There is in the public mind an idea that there is something disgraceful, something to be hidden in the fact that the mental equipment of one member of the family is below average. The occurrence of mental disease is by many regarded as evidence of a stain on, or a reproach to the family. This attitude can be explained on the basis that we commonly view with horror or with superstition those things which we do not understand. It not so long ago that all disease was considered as a punishment for sin, or due to the activities of evil spirits. With an understanding that a physical disease was due to natural causes, which develop gradually, it appeared. However, many persons still cling to the old idea concerning mental disease.

Although our physical and mental conditions are unequal, we can, by making the best of what we have, enjoy physical and mental health. We cannot all attain to the same degree of health, but nearly all of us can secure a measure of health which will bring happiness to ourselves and

those around us. Health is that condition of well-being which enables us to live happy useful lives. It means that we are able to adjust ourselves to the work we have to do, and to live in harmony with those around us.

Physical and mental health go hand in hand. What good is it to have a strong body and a quarrelsome disposition? If life is full of fears and loneliness what happiness is there? Such individuals are not healthy, because their early training has not brought them to face and understand the actual conditions of life.

Health is the product of a proper development of the whole child, physically and mentally, so that as he grows up he will have an understanding of himself and others which will enable him to meet the problems of life and to live happily with other people.

The mental life is not as readily understood as the physical life. It requires more study and thought on the part of parents if they are to give their children a fair chance for a happy, useful life. What the child will be as an adult is not so much the result of the body and mind he was born with as it is the product of his early training by his parents.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

News Notes

Mr. and Mrs. Maurice Cooper have moved back to Raymond for the winter and will live in part of J.E. Earle's house.

Frank Atterton has been busy this week shingling his new home. He is all ready now to have the new chimney built in it.

Miss Josephine Radcliff, teacher of piano, theory, pipe organ, and Mrs. Laura Marshall of Lethbridge, teacher of vocal, will be at the home of Mrs. E. McBride on Saturday afternoon from 4:30 to 7:30 to arrange classes in the above.

THE RELATION OF WEATHER TO PLANT DISEASES

(Experimental Farms Note.)

We learn from reference to literature that plant diseases have been known to man since the dawn of history. In the efforts to explain scourges which befell crops, possibly the nearest approach to accuracy was in attributing various forms of injury to climatic or weather conditions. There was more truth in this belief than in any of the countless evil influences to which were ascribed the diseases of cultivated plants; for just as climate is an important factor governing the existence and distribution of higher animals and plants, so is it important in the life of lower animals and plants recognized as plant pests. All notions regarding plant diseases were inspired by superstition rather than by scientific facts; yet it is to the credit of the ancient people that such deductions were based upon the observation that outbreaks of disease were accompanied by certain micro organisms were responsible for disease. Then, as the science of plant pathology grew, it was realized that in certain years some diseases were conspicuously severe and others very mild or perhaps entirely absent; and the direct opposite occurred when different weather conditions prevailed.

In recent years weather and disease relationships have been the object of intensive research, constituting a problem which, although exceedingly important, is still in its infancy. The ultimate goal is a system of weather forecasting which will be sufficiently reliable to enable the plant pathologist to foretell outbreaks of plant diseases. Fruit growers, gardeners, and farmers informed from this source would be able to take the necessary measures to prevent crop injury through disease outbreaks.

In the literature on this subject there are numerous references to the relationships between weather conditions and plant diseases. In Canada at the various laboratories of the Division of Botany, some important advances have been made in the study of the factors which comprise "weather", the most important being recognized as temperature, humidity and precipitation, wind and light. For example primary infection with the fungus causing potato blight is dependent upon comparatively cool weather and once the disease has started to develop warm weather is essential for an epidemic; yet excessively hot weather arrests its progress. Powdery scab of potatoes is known to be a cool weather disease as it is common only during years that are cool and wet. Common scab, on the other hand is a hot weather disease. As a result of carefully organized research, information of great value has been gathered throughout Canada in connection with stem rust of grain and among other things, it would seem that the wind carries the rust spores into Canada from the more southern wheat growing areas. Finally, with the aid of aeroplanes equipped with spore traps it was found that rainy weather cleared the air of these spores, since only a very few spores were trapped in wet weather.

R. R. Hurd,
Dominion Experimental Station,
Charlottetown, P. E. I.

If a few pots are planted each week from September until Christmas, a long succession of bloom will be obtained.

Canadian Garden Service

Of the four seasons, spring alone is more important than the one just commencing, for the Canadian gardener. Not only at this time are the fruits of the earlier work harvested, but plants are prepared for the rigorous days of winter, and even in the coldest districts of the Dominion there are certain flowers and vegetables to be put in now for an early start in 1933. Few people with any ground or window space at their disposal neglect the garden in April and May, but there are far too many who overlook the possibilities of fall work. By taking advantage of the September and October planting season it is possible to give many things a much earlier start over those set out in the spring and it is also possible to furnish a wealth of bloom from spring flowering bulbs to bridge the gap until the autumn commences to show their colors.

GENERAL FALL WORK

Under the heading general work will come grass seeding, the introduction and moving of perennials, perennial flowers, the planting of rose bushes, shrubs, ornamental and fruit trees, vines and practically any other nursery stock which is usually set out early in the spring, but which may also be planted at this time. There will also be a certain amount of pruning of early flowering shrubs; the removal of all the old raspberry canes and a general clearing out of two year old wood from the climbing roses. Pear and bean vines, past bearing, and any other garden refuse including weeds, should be dug under, early to think about this just now, amount of fertilizer and it will, however, be a valuable ingredient in both heavy and light soil. Later on when the wind begins to blow from the north and frost has laid everything low, but the frost October and November blooming Chrysanthemums are a sort of winter protection in the form of leaves of a dry mulch or snow will have to be considered, but it is too late for this sort of thing unless a certain

SOIL GRASS SEED

Grass and clover are the best for planting and as a rule make their best growth either before or after the heat of summer. Generally speaking it is a waste of money and effort to sow seed in July or August though this season, in Eastern Canada at least, those who did so very lucky. The reason of course, for such unusual growth and it also explains the dry field which awaited the returning season when he put away his fishing rod and brought out the lawnmower was the unusually cool summer weather and the amount of frequency of the rain. In patching old lawns or sowing new ones, it is important to stir the soil thoroughly killing any weeds, and above all things to make as level as possible. Only the best lawn grass mixtures, especially blended to suit Canadian conditions, are recommended and these should be sown at the rate of at least one lb. to every 200 square feet and more than that where sportsmen and warblers are provided. Cover lightly by raking and very only. After seeing it in advisable to go over surface with roller or pounder.

PLANT BULBS NOW

It is the time to plant spring and winter flowering bulbs like the crocus, daffodil, hyacinth, Chinese lily, general others, but so well known. These bulbs are growing rapidly in popularity in Canada and they should become they are a large number and furnish a wonderful bloom at a time when flowers are very much appreciated. They should be set out from now until the ground freezes and by using several types a succession of bloom from early May until the time can be obtained. Most of these bulbs, and especially the ones tulip, hyacinth, crocus, daffodil, should be set out in full light and living room or in doors from late May until about if the bulbs are planted in a garden flower or ordinary lawn. They must be started in a dark place first, and then in a light place. If the bulbs are set out in a light place, they will not bloom.

IT WILL BE A BUSY FALL

With threshing far from finished in the district as a whole, beet digging is commencing in the Taber-Barnwell district tomorrow, and will be under way here the first part of the week, and for three weeks or a month, the beautiful yellow roots will be finding their way into the factory by team, truck, and railway. The season has been favorable for beet. A heavy tonnage is expected as beets, especially the late rains, which have maintained a fairly good supply of moisture in the soil so that the beets will come out of the ground full of moisture and in very good shape.

All in all the season has been good. The wheat yield is a little disappointing, so far as bushels per acre go, but the quality of the grain generally speaking is good, and the numerous straw stacks dotting the fields is an insurance of a liberal supply of stock feed for the winter at least. While most districts around here have had some hail, or destruction during the summer, and one district a wind, rain and hail storm that damaged some wheat fields to a large extent as late as last Sunday, we have escaped unharmed, except for the drought which was worse in many places than here, and even now, districts to the west are anxiously watching the heavens for rain clouds to appear, as they have not had a rain of any consequence for the past month and a half. So, we have been fortunate.

And now the beet harvest is here. Throughout the beet growing area this year 14,000 acres and upwards have been under intensive cultivation. This means this acreage of good, clean and more fertile land for next year's crops. No summerfallowing day after day with no visible returns from the work as dry land farmers and those interested only in grain crops must do. All over Alberta today you can see thousands of acres of summerfallow, ready for next year's crop, that during the past summer has been worked two, three and four times, preparing it for next year. This is essential of course, and must be done. But where those who grow beets have their beet acreage clean and ready for next year's crop with out any summerfallowing, and with a lessening of the soil drifting problem, the men not so fortunate, are faced with this extensive cultivation, figuring at least to \$3.00 per acre in order to retain some semblance of control of the weed situation, and then on top of this, worried over the soil drifting question of Western Canada. Today in the district from Lethbridge north nearly all fields are worked on the strip farming system with a narrow strip of crop, then a narrow strip of summer fallow, to prevent the wind getting such a sweep of the land and starting the soil to drift, and still the drifting problem is unsolved, and other systems are being tried to prevent this.

Ordinarily this does not present any problem to the farmer who has beet land. With the soil has been thoroughly worked during the summer, when the beets are lifted in the fall the surface is not pulverized as it is when summerfallowing, and the soil is packed enough to keep it from blowing. So that besides all the other advantages of a crop like beets, or some other crop as a money maker and a cash crop, there is the added advantage of good, clean land for next year without the expense of summerfallowing.

Of course, everyone could not grow beets. But many more beets could be grown in Raymond and district than are grown at present. And, too, beets are not the only field crop that could be successfully grown in southern Alberta. Judging by the past, it appears that we are going to be forced into some other farming program than grain farming and summerfallowing, or else, it looks very much as if we would be forced off the farms, because grain farming seems to be getting less and less profitable every year. There will be problems and it's not but's in every line of endeavor, but it seems something must be done. There are many avenues to reduce the dependence on grain entirely, and at the same time to improve our farms and surroundings. The recent Imperial Conference lifted the ban on cattle and hogs to the British market to quite an extent, so that under ordinary conditions a better price will be realized in Britain for our live-

stock. This makes one opportunity. Of course, no one is keen on stock raising at present prices, and yet there is about as much money in stock raising as there is in anything else at present prices, and if one is going to get in to the business, now would be a good time to start. Then, too, Raymond ships in an endless quantity of butter and cheese. Why not get a creamery and Cheese Factory here and be a producing centre for these commodities, instead of merely consumers. We have the finest potential possibilities for dairying here of any district in Alberta and we should be exporters and not importers. Maybe we don't want to milk cows, either, and with beets, and their by products, we have the finest feed for dairy cows, hogs and the other things that go with mixed farming, that could be found any place.

If we would like to get past the stage of financial worry and distress we have many avenues to work to, but it takes more real honest to goodness work and labor than most of us want to put into it. Life for us has been far too easy and we are a good bit like the prodigal son of Bible times. We will hew out our own future, or will we sell out for a song to those who will work and let others get our inheritance away from us. It is a good time to think it over.

WHO WANTS TO FARM?

I was out in the country the other day and when I saw the great fields of grain waving in the breeze I wanted to stop the car and pay cash for a good farm right there. It's the only life, believe me!

On the ranch is where I am always sure of a square meal. And when I hear a hen cackle I stall around waiting for an invite to stay all night, so I can get a fresh egg for breakfast once in my life.

Personally I don't think Bennett or Brownlee had a conserved thing to do with that hen laying that egg. And the bacon tastes just as good as when I was voting steady for Bryon. I don't want to suggest that the farmers have no problems. But if there are 50,000,000 in Canada, I happen to know 49,999,998 of them—merchants, manufacturers, ministers, farmers, butchers, bakers, bootleggers, lawyers and Jim Harrison—and they are as full of problems as our dog is of fleas. The other two, Gene Tunney and Bud Williams, seem to be out of the wet but they are young yet.

The farmer is like the shoemaker who sat on his wax and couldn't get away, so he stuck around till he got rich. Yes sir! Everybody I know is pretty miserable, thank you! Just discontented enough to put zest into life. When we make both ends meet and they begin to lap over, the game gets stale. And then we turn to golf, psychoanalysis and diabetes, and we probably discover that we need an operation. Anyway, I bless the farmer. I reckon I could get along some how without pants, but I know I couldn't without a loaf of bread. Got so hungry for meat today that I chased a rabbit six miles, but he climbed a tree and got away.

I often wonder what would happen if I got a farm. Ten to one if I raised hay every galoot for miles around would sell his horses and get a new automobile, or perhaps a Ford if he could afford it. Then I'd have to sell my farm and start a gas station and run a wayside saloon for thirsty tin lizzies. But, I'm an optimist. For 25 years I've been figuring it was all off with the farmer, but he's always there. Johnnie on the spot. His kids get bigger and fatter and more of them every year, and he trades in his old car and gets a new one just the same as if he wasn't suffering. His daughters get prettier all the time and marry good looking boys from the next township.

I can't figure it out. Buffalo Bill used to say that the best way to fight Indians was to run like t---. But you can't heat the farm game by running away from it. Everybody has a remedy for the farmer's troubles but nobody has a cure. The greatest agricultural publication in the world is the Congressional Record. Read it and sleep soundly.—Pizen in the Clarion Press.

Harvest Time

The school inspector was testing little Tommy's general knowledge powers.

"Now, then, my lad," he said, "tell me which is the harvest season."

"From November to March," Tommy promptly replied.

"Come, come," said the inspector, "I'm surprised that you should name such barren months. Who told you that they were the harvest season?"

"My dad," said the boy, "He's a plumber."

News Notes

Magistrate Low was in Raymond on Tuesday listening to a court case or two. He was accompanied by Constable Ellis of Magrath.

The Trades and Labor Congress of Canada seeks a six hour day and five days a week to reduce the employment situation.

The Safeway Store in Lethbridge was entered Saturday night, believed to have been through the coal chute, and robbed of \$223.00. No arrests have been made as yet.

Mrs. Loughheed, wife of the construction engineer in charge of the Steffens House at the Factory, has been here for the past four weeks, visiting relatives and friends in the district.

Due to the session of parliament on October 6th, the 15th of this Excellency, the Governor-General and party to Lethbridge was cancelled. This last minute cancellation was the cause of general disappointment.

More men have been put to work in the miners in Blairmore and Bellevue following the strike settlement of last week, and coal hoisting started on Thursday last. It makes every one feel better to have the mine going full blast again.

Fifty killed and 80 injured was the toll in a train wreck in Algeria Wednesday, when a troop train fell into a ravine. It is thought the falling of the roadbed following heavy rains was the cause of trouble. Five hundred were on board the train.

The "Flying Hutchinsons" were rescued in Greenland by a British trawler on Tuesday after a leaky gasoline tank had forced them down and their ship was wrecked on the reefs. Eskimos helped them rescue their instruments and most of their supplies after the family had waded ashore.

Burgars in the Reach Store in Macleod made preparations for a good stroke of business Monday night when they packed three sacks full of clothing and cigarettes in the Reach and Co. Store, but apparently they were disturbed in their work and made their getaway, leaving the sacks inside the store. Police are working on the case.

And still there seems to be one born every minute. At the auction sale of the personal belongings of Ivan Kreuger, Swedish Match King held last Friday, curio hunters paid \$12 for a small pair of selvors with Kreugers name on them, and ordinary kitchen kettles worth about a dollar sold for ten times their value when new. And all because they belonged to Kreuger.

News Notes

If You Have any rooms or a house to rent, a Want-ad. in the 'Recorder' will get you a customer in short order, as it has many others in the past few weeks. Try it and see.

The Dominion Government Bureau of Statistics estimates the Canadian wheat crop this year at 435,000,000 bushels, and oats 422,529,000. Other coarse grains are barley 88,050,000 rye 12,725,000 and flax seed 3,129,500 bushels.

Working on a programme of economy, a number of supervising positions in the C. N. R. have either been done away with or amalgamated with other departments. It is reported that a big saving has already been effected.

When a U. S. Air Liner hit a mountain side in Texas two pilots, W. J. Robbins and Francis W. Briggs, and a passenger Victor E. Man of St. Louis were killed, and a second passenger Geo. A. Davidson was saved by being

ening his safety belt just before the crash and jumping clear just before the boat burst into flames. It is thought the jar stunned the other three when they were thrown forward and came into contact with the walls of the ship and before they were fully aware of the danger the ship was a blazing mass and they all three perished.

to help the millions of men and women who have lost or are losing their vital physical power. In his 35 years of practice and research, however, he realized that the weakening of man's glands was also responsible for other troubles; High blood pressure, hardening of the arteries, physical exhaustion after work or exercise, nervousness, depression, neurasthenia, etc.

All these troubles can be removed with Titus Pearls. Numerous cases were treated by Dr. Hirschfeld in his Berlin Institute L.S. (State Clinical); 60 years old, married) complained of physical exhaustion, dizziness and tremors. Was easily tired. Menial powers dull and slow moving. Physical powers had been incomplete for previous 5 years. Blood pressure too high. Given 2 Titus Pearls 3 times a day. 2 weeks later the medical report on this man was: General health better, more vigor; dizziness much less and returning of power. Treatment continued and 2 weeks later L.S. reported again, this time to say that all weariness and exhaustion had gone; he felt fresh and buoyant. His blood pressure had fallen, and at 60 years of age he had regained the physical power and virility that he had known in the prime of his life.

Start regaining your youthfulness now! Today! In 2 weeks time you will be aware of the new, virile force within you. Send \$5.00 (cash registered or money order) for 2 weeks treatment. C. C. D. Orders accepted. WRITE FOR BOOKLET.

News Notes

Winds of almost cyclonic proportions north of Edmonton wrecked the telegraph and telephone lines and cut the north off as far as communication is concerned. In Edmonton little damage was done.

The Opening Social of the Raymond First Ward Mutual was held in the High School on Tuesday evening and a very enjoyable time was had. A good crowd was present considering the busy season, and everyone enjoyed themselves in dancing, games and refreshments.

The clothing store of Kassel and Co. in Shelby was entered Saturday night and \$200 worth of clothing stolen. The ones who took the stuff took only the best and knew just where to get it, and were also familiar with the store as they made their way in by drilling through the store door, and they knew just where to drill to unhook two hooks that held the door shut. Glass was broken out of the inside door and the bolts slipped back and entry made.

Houses are scarce in the town now as many are moving in to settle for the winter months and for school.

Hyram Fromm has been in the Safeway this week helping to prepare for the opening of their store tomorrow.

Premier R. B. Bennett has announced that Parliament will open on Oct. 6th, and may sit for five weeks. It will be a regular session he says.

Cecil Hutchinson is in St. Michael's Hospital in Lethbridge with a very bad case of Typhoid Fever. On Tuesday his condition was not very encouraging.

When a ferry capsized at Kurz, Japan, 24 Japanese men and women aboard the ferry which was caught in the backwash of a passing steamer.

Last Thursday forenoon one of the worst gales for months swept the district tying up threshing and only those who had ventured out of doors into the windstorm. Luckily it only lasted a few hours.

News Notes

Gene Pearson was in Lethbridge on Wednesday.

Beet digging will start in the Taber-Barwell district tomorrow, and will be underway all over the district the beginning of next week.

FOR SALE — Parlor Rug, 9x10 1/2 feet also Mattress for full 4 ft 6 in. bed. Phone 138 or See Mrs. Thos. Allan. 2822

These are the days when the Elevator men are about the busiest people in town, being on the job from early to late as the trucks and grain wagons roll in from all directions.

We have an article from Mr. Compton on the history of the Bank of Montreal in Raymond. This will appear in next week's issue of the paper and we commend it to our readers.

R. E. Nuttal, Lou Fisher and A. S. Jones have been working in the Safeway Store this week helping get things ready for the opening tomorrow.

The Second Ward have another great Carnival planned and the tentative dates are Nov. 2, 3, and 4th. It will be even better than last year's was, and that is saying plenty, as last year's was one of the finest fun-fests ever staged here.

Here and There

Maintaining her position among world nations as a producer of minerals, Canada led the world in the production of nickel and asbestos in 1931, came second in gold, platinum metals and cobalt, third in silver and fourth in refined zinc.

Mystery cruises, so popular out of New York, Southampton and Montreal, have come to the Pacific Coast, being ushered in there by the trim little coastal liner "Princess Patricia," of the Canadian Pacific service, which took the first of these cruises recently. The ship had a full sailing list.

The Canadian Open Golf Championship, third of the ace contests figuring yearly in the Royal and Ancient game, will be staged on the course of the Royal York Hotel, Toronto, next year, word to that effect having been received by the secretary of the links from the Royal Canadian Golf Association.

Seventy-seven per cent. of wheat and 63 per cent. of oats and barley in the three western provinces were harvested by September 3, according to the report issued on that date from the general agricultural department, Canadian Pacific Railway, Winnipeg. This result was reached in spite of the halt in harvesting operations due to heavy rains in wide sections of the Prairie Provinces.

All records for the story of the "big one that got away" were broken recently when a well-known fisherman hooked a beaver in Vermillion Lakes and played it for five minutes after which the tradition was fulfilled with loss of fly and leader. The hero of the exploit was S. C. Bennett, of Toronto, a guest at the Banff Springs Hotel.

Canadians got a thrill recently when Captain J. A. Morrison, intrepid trans-Atlantic solo flyer, spoke over the air, which he has conquered, from the Mayfair Lounge of the Canadian Pacific liner Empress of Britain. Captain Morrison was heard on 34 radio stations from Halifax to Victoria over a network arranged by the Canadian Pacific Department of Communications. Loud speakers distributed the broadcast to 60,000 visitors at the big exhibition at Toronto.

Though the "Princess Royal," veteran of the Canadian Pacific Railway B. C. Coast steamship fleet has been scrapped and is now in the limbo of departed ships, her forecastle bell remains on the air at Ocean Falls, B.C., where it has been installed at the Ocean Falls United Church mission, which ministers to the spiritual welfare of Japanese children.

Official and unofficial delegates to the Imperial Economic Conference went sightseeing from August 12th to the 14th. Two tours from Ottawa were arranged, both leaving the capital in special Canadian Pacific trains late Friday night, August 12. Shawinigan Falls and Three Rivers were visited by one party, while the other members were cruising down the St. Lawrence from Kingston to Montreal and spending Saturday evening in the metropolis. None of the United Kingdom, Canadian, Australian, New Zealand or Newfoundland or Irish government ministers were able to absent themselves from Conference deliberations, but their delegations were well-represented. Ministers enjoying the trips were Hon. N. C. Havens and Hon. A. P. J. Pourie, South Africa, and Hon. H. W. Moffatt, Southern Rhodesia. The Canadian Government was represented by Hon. Arthur Sauve and Hon. Maurice Dupre, with the Shawinigan party, and Hon. Alfred Durand and Hon. H. A. Stewart, with the other party.

CANADA'S

Permanent Character

There is iron and rock in the veins of Canada, as well as gold and silver. The stern and heroic qualities that conquered a wilderness and built a Dominion, united from Ocean to Ocean, still predominate in Canadian character. There is a permanency in this country that grows out of that character. It is expressed in institutions as well as individual craftsmanship and frugal industry.

The Bank of Montreal was the first permanent Bank in Canada. Having successfully co-operated with this country's people and business through the ups and downs of 115 years, the Bank today faces the future firm in its faith in the permanency of Canada's progress and the character and resourcefulness of the Canadian people.

Goodrich Torture Chamber

reveals the new 26% better

SUPER CAVALIER

the SUPER the THRIPT

IN the Goodrich laboratory, the story of huge machines that hammer and pull at the very heart of a tire, destroying its weaknesses. Daily hundreds of such tests run the gamut of these machines.

This is the Goodrich Torture Chamber. These steel monsters are part of a never-ending determination to make the tire — tires that are worthy of the name Goodrich.

Out of this constant testing and proving comes the new Goodrich Super Cavalier. A brand-new tread design—a heavier, tougher tread, a stronger carcass. All the way through, a 26% better tire than ever before.

HERE ARE THE THRIPT PRICES

30 X 4.50	\$10.70
28 X 4.75	\$10.80
29 X 5.00	\$11.80
28 X 5.50	\$14.70

COMPANY, LIMITED
THE BIG DEPARTMENT STORE

WORK THIS OUT

It has been the privilege of the pleasant town of Kelowna, B. C., to solve the economic problems of the world. And it is so simple that one can only wonder no one ever thought of it before. It appears that a man who wanted a tie went and bought it in a store. He gave the merchant a cheque for a dollar. The merchant passed on the cheque to a restaurant for his lunch and it went from hand to hand until it had twenty endorsements. When there was room for no more, it was paid into the bank where it was found that there was no account.

The twenty signatories then met it transpired that each of them had made a profit of approximately 25 p. c. Wherefore they contributed 5 cents each and redeemed the cheque. They are now wondering who lost the original dollar that did not exist.

This is a fine example of modern finance. If the cheque had been paid at once, one man would have lost a dollar. As it is, twenty men each made 20 cents.—Exchange.

News Notes

WANTED TO BUY—Pollets or Young Hens.—See P. Nakamura.

Police Magistrate J. W. Low, of Cardston was a Raymond visitor on Thursday last on official business.

SCRATCH PADS—All sizes and colors. Very HANY and very CHEAP. Nuff sed.

FOR RENT—Two furnished rooms for light housekeeping. See Charles Walton.

Do you realize that since the first of June, the price of Milk, delivered has been 16 quarts for One Dollar. Buy it while it is cheap. — C. E. Hancock.

Frank Atterton is on the job again in the Raymond Photo Studio after spending the summer at the Prince of Wales Hotel. He says that while the season was not what was expected that everything considered it was not bad in the way of tourist business.

The Broadway Store

The opening Social of the Raymond Second Ward Mutual will be held on Tuesday, Sept. 20 th. Instead of the 13th as was originally planned, the date was changed because of the Ward party coming on Friday, Sept. 16th. All interested kindly take notice of this date. The party will be in the Ward Hall.

Three fisherman were fined \$100 each and costs last week for fishing in a closed stream in the High River area. On top of this the fish were confiscated, along with their poles and tackle. The Magistrate stated that similar offenders would be fined more as these closed streams must be left alone.

We're Glad To Be Here

Safeway Stores is glad to bring to Raymond the advantages of economy and service that have made our stores so popular in other parts of this country.

WE OPENED OUR FIRST STORES IN CANADA, OCTOBER 18th, 1929. THEIR PUBLIC ACCEPTANCE WAS IMMEDIATE AND ENTHUSIASTIC. IN THE MONTHS THAT HAVE FOLLOWED THEIR POPULARITY HAS INCREASED STEADILY. UNTIL TO-DAY THERE ARE 140 STORES IN WESTERN CANADA SERVING THOUSANDS OF PEOPLE CONSCIENTIOUSLY AND SATISFACTORILY. AND MANY FAMILIES DEPEND ENTIRELY UPON SAFEWAY STORES FOR THEIR FOOD SUPPLIES

Quite Frequently when it becomes known that Safeway is coming to town, others in the food industry, knowing our policies and the advantages therein to the consumer, immediately revise their prices downward, directly admitting that their methods have been wrong. Since we bring to you greater values, larger savings, and a more courteous, interested and satisfying service than perhaps you have been accustomed to, we believe that you will wish to trade with us, and to this end we pledge our strength.

EVERY ITEM SOLD BY SAFEWAY BEARS AN UNCONDITIONAL GUARANTEE TO SATISFY. IF FOR ANY REASON IT DOES NOT, THE MONEY WILL BE CHEERFULLY REFUNDED.

Safeway employees in the Raymond store pledge their loyalty to the community of Raymond; will be pleased to carry their full share of the community's burdens, and willingly discharge every civic duty. To assist in this and to better serve you, they are anxious to know you, and invite you to come in and get acquainted.
